

Gabriel Gumprich Delfino Silva

silvagabegd@gmail.com | (703)-343-3850

EDUCATION

University of Virginia

B.A. in Computer Science, B.A. in Economics

Charlottesville, VA

May 2026

Georgia Institute of Technology

M.S. in Analytics (Data Science)

Atlanta, GA

Starting Fall 2026

EXPERIENCE

434 Accelerator | Land Credit

Charlottesville, VA

Accelerator Fellow – Data Science & Product

Aug 2025 – Dec 2025

- Selected into 434 Accelerator, a venture program supporting high-growth startups; contributing to Land Credit, an early-stage SaaS platform for land conservation tax credit transactions.
- Engineered **ML lead-generation pipelines with Python** using Virginia property *data* and satellite imagery to identify parcels with the highest conservation easement returns.

Electronic Arts (EA)

San Francisco, CA

Analytics Intern

May 2025 – Aug 2025

- Delivered pivotal analysis on coordinated teams vs. solo performance across 1M+ matches in Apex Legends; findings **directly influenced core matchmaking design** and informed balance adjustments adopted by senior game designers.
- Identified 5 new key behavioral features influencing first-game churn** by building and evaluating machine learning models (logistic regression, random forest, XGBoost) with Python and SQL, supporting retention initiatives.

Data Analyst Intern

May 2024 – Aug 2024

- Spearheaded the end-to-end development** of an innovative data-driven system to detect player collusion in Apex Legends (170M+ players), enhancing game integrity and user experience.
- Engineered **robust SQL pipelines** in Snowflake to extract and transform gameplay data for model training.
- Conducted statistical analysis and linear model testing in **Python** to improve detection accuracy and reliability.
- Boosted operational efficiency by over 500%** by automating delivery of daily model outputs into **Snowflake**, enabling near real-time review and enforcement by the Security team.

UVA Darden School of Business

Charlottesville, VA

Technical Research Assistant (Digital Asset Research)

Sep 2023 – May 2025

- Supported research and quantitative analysis as an **acknowledged contributor** to three published studies on DAO governance, crypto investor behavior, and Web3 M&A, including one presented at **ETHDenver 2024**.
- Built Python pipelines integrating CoinGecko, Moralis, and Messari APIs to collect, clean, and visualize historical market data, wallet transaction histories, and crypto news for over **1000 digital assets**.
- Analyzed 200+ Web3 M&A deals to identify consolidation trends across DeFi, NFT, and L1/L2 ecosystems.
- Performed regression analysis using STATA to identify trends in investor behavior after a crypto bank collapse.

PROJECTS

Kalshi News Signal Analysis | github.com/gabes19/kalshi-news-signal

- Analyzed 300+ days of macroeconomic news and Kalshi CPI prediction-market data to construct a dataset linking news signals to market expectations.
- Applied transformer-based sentiment analysis (HuggingFace) to convert headlines into quantitative features, aggregating daily metrics including sentiment mean, variance, and headline intensity.
- Engineered market features from Kalshi probability distributions including expected CPI, implied volatility, rolling volatility, and tail-risk indicators to analyze relationships between news flow and prediction-market dynamics.

StudyRoomFinder | github.com/gabes19/StudyRoomFinder

- Developed a full-stack web application to track and display real-time study room availability at UVA.
- Built AWS-based pipeline (Lambda, RDS, PostgreSQL) and visualized space usage trends with Plotly.

TECHNICAL SKILLS

Python, SQL, Java, R, STATA, Pandas, NumPy, scikit-learn, PyTorch, Snowflake, PostgreSQL, AWS (Lambda, RDS, S3), Docker, Git, Tableau, Excel

LANGUAGES

Native Fluency: English & Portuguese; **Proficient:** Spanish

ACTIVITIES AND LEADERSHIP

Brazilian Student Association – UVA BRASA (Treasurer), UVA Men's Club Soccer, Data Science Club, Google DSC @ UVA
